Summary

Python Backend Developer specializing in FastAPI and PostgreSQL, experienced in building scalable REST APIs and backend systems. Developed real-world projects including an e-commerce backend, student management system, and financial API, with a focus on efficient, production-ready solutions.

Comfortable working in remote environments, with strong communication, problem-solving, and time management skills, enabling effective collaboration and independent delivery of high-quality software.

Education

SR University

Computer Science

MS in Computer Science • 8/10

Warangal, India • Aug 2025 – Present

Focused on Data Science for Intelligent Systems and Artificial Intelligence.

Experience with cloud technologies, operating systems, and advanced database management.

Knowledge of Generative AI, Reinforcement Learning, Natural Language Processing (NLP), and Image Processing.

<https://sru.edu.in/>

Rimt University

Computer Applications

Bachelor of Computer Applications • 8.09/10

Sirhind, Fatehgarh Sahib, India • Aug 2022 – Jul 2025

Strong academic foundation in Python programming, cloud computing, and software engineering. Proficient in data structures, object-oriented programming, and relational database management systems, with knowledge of operating systems and cloud technologies.

<https://rimt.ac.in/>

Experience

HNG

Backend Developer Intern

Remotely

Oct 2025 – Dec 2025

Developed scalable RESTful APIs and backend services using Python frameworks (FastAPI, Flask).

Designed and optimized MySQL/PostgreSQL databases, implementing secure CRUD operations and improving query performance.

<https://hng.tech/>

SkillsFied Mentor

Data Analytics Intern

Remotely

Jun 2025 – Aug 2025

Leveraged Excel, SQL, and Python to conduct Exploratory Data Analysis (EDA) and uncover key business trends.

Supported data reporting initiatives by synthesizing complex datasets into actionable insights.

Projects

Student Management System (In Progress)

Jan 2026 - Present

Developing a scalable backend system using FastAPI and PostgreSQL to manage student records, implementing secure authentication, optimized CRUD operations, and RESTful API endpoints for efficient data processing and management.

E-Commerce Platform (Backend Completed, Frontend In Progress)

Dec 2025 – Present

Developed a scalable backend system for an e-commerce platform using Python (FastAPI) and PostgreSQL, implementing product management, order processing, and RESTful APIs. Currently integrating the frontend to deliver a complete full-stack application

https://github.com/Kpellehboy/Leelah-carft_Backend

Country-Currency-Exchange API

Oct 2025 – Nov 2025

Engineered a RESTful API with Python and Flask that integrates external country and exchange rate data, processes economic indicators, and implements optimized CRUD operations with MySQL-backed caching for improved performance and reliability.

<https://github.com/Kpellehboy/Country-Currency-Exchange-API>

Skills

🔗 Languages:

Python, JavaScript, TypeScript, Node.js

🔗 Backend:

FastAPI, Flask, REST APIs, Express.js

🔗 Databases

MySQL, PostgreSQL, Database Design, SQLAlchemy

🔗 Data Science & AI

Generative AI, Applied NLP, Machine Learning, Scikit-learn, NumPy, Pandas

🔗 Tools

Git, GitHub, Railway, Vercel

🔗 Cloud (Basic)

ASW (EC2 S3 - Fundamental)

Certifications

Full Stack Software Developer Professional Certificate

April 11, 2025

IBM (Coursera)

Built backend applications with Python, Node.js, Express, and Django, deploying scalable solutions using containers, microservices, and serverless technologies. Strengthened skills through hands-on projects and a GitHub portfolio.

<https://coursera.org/share/3754328b78167dab9f8a415c9866abac>

Python Training

Nov 2024

IIT Bombay – Spoken Tutorial

Trained in core Python concepts such as data structures and file handling, applying problem-solving skills to support backend development.

<https://spoken-tutorial.org/software-training/test/participant/certificate/122325/3809048/>

AWS Cloud Technical Essentials

March 31, 2025

AWS (Coursera)

Learned AWS fundamentals including IAM best practices, EC2, S3, and VPC (basic level). Gained knowledge of Regions, Availability Zones, and cloud vs on-premises infrastructure.

<https://www.coursera.org/account/accomplishments/verify/FMBYPXN0IGWB>

Google Data Analytics

June 29, 2025

Coursera (Google)

Skilled in data cleaning, analysis, and visualization using SQL and Python, with experience generating insights and building dashboards to present results.
